A MIND TOTALLY FILLED WITH **MISGUIDED DECISIONS 4**

The port city's religious leaders, in their fervor, called for divine intervention, often invoking the name of God to rally the faithful around the idea of a "color" revolution.

They claimed it was a divine mandate to dismantle the pervasive corruption associated with the so-called godless king.

Their vision promised a utopian democracy, one that would give rise to an astonishing array of over 1,000 political parties.

However, rather than uniting for the common good, these factions spent the majority of the past year engaged in a cacophony of accusations, each party alleging that the others were robbing the populace blind.

This chaotic political landscape has not

A MIND TOTALLY FILLED WITH
MISGUIDED DECISIONS 4

only failed to deliver on its promises but has also deepened the very divisions it sought to eradicate, leaving many to question the true nature of this so-called revolution.

One day, a compelling critique or an academic analysis will emerge, shedding light on how even the most fervent advocates for the welfare of the common people can become utterly compromised by the seductive allure of power that arises in the wake of a government's downfall.

This narrative, often recited as a convenient justification, highlights the plight of well-meaning revolutionaries who, thrust into positions of authority without the requisite experience or the practical wisdom typically associated with effective governance, struggle to

navigate the complexities of leadership.
The prevailing belief is that these
individuals, despite their noble
intentions, are ill-equipped to manage
the intricacies of statecraft, leading to a
cycle of disillusionment and failure.
Yet, whether this pattern will continue
or evolve remains uncertain; only the
passage of time will reveal the true
consequences of such unprepared
ascensions to power.
This discussion has veered far from my
original intention, as it seems that
political matters are more suited for
late-night talk radio than for a
straightforward picture book.
However, I must assert, with all due
respect, that my perspective sheds light
on the underlying reasons for our
current circumstances.

The crux of the issue lies in the overwhelming number of individuals vying for existence within a constrained space, compounded by an even scarcer resource base that is essential for equitably distributing wealth among the myriad participants in our complex political landscape.

This situation underscores the challenges we face in fostering a truly democratic society, where the needs and aspirations of all citizens can be met amidst the chaos of a fragmented political system.

The leading story in today's English-language news daily highlights a significant oversight by the government regarding the investigation of 30 prominent Maoist leaders.

These individuals, who may ring a bell

from last year, were a group of disheveled yet endearing young adults, often likened to college students on a quest for purpose during their gap year.

They believed that embracing the mantle of revolutionaries would be an adventurous way to spend their time, but their actions during last year's civil war took a dramatic turn.

Instead of merely dabbling in idealism, they became formidable opponents to the corrupt military, challenging the status quo in ways that few anticipated.

Today, the failure to hold these new leaders accountable raises critical questions about the government's commitment to justice and the implications of allowing such influential figures to operate without scrutiny. I vividly remember reading about this in

the newspapers, captivated by the audacity of the powerful government officials who were ousted in a matter of weeks.

It was astonishing to witness how they systematically dismantled the nation's assets, stripping it of anything that held value.

In a frenzied rush, they packaged everything up for export, ensuring that the wealth of the country was whisked away while they secured secret, midnight flights to their newly acquired mansions.

These lavish retreats, often nestled in glamorous locales like Monaco, became their sanctuaries, where they could indulge in the luxury of expensive Italian sports cars.

The allure of Monaco, with its enticing

tax benefits for foreign wealth, only added to the surreal nature of their escape, leaving behind a nation in disarray while they reveled in their newfound opulence.

As I sat sipping my coffee at the local FamilyMart today, I couldn't help but reflect on a timeless warning from the band The Who:

***"New boss, same as the old boss...
Don't get fooled again!"***

This sentiment resonates deeply in our contemporary world, where the headlines seem to echo the same themes of power and control that have persisted through the ages.

It raises an unsettling question: is it too far-fetched to suggest that corruption has become yet another constant in our lives, alongside the well-known

certainties of death and taxes?

The evidence is all around us, as scandals and unethical practices continue to surface, revealing that despite the changing faces in leadership, the underlying issues remain stubbornly intact.

This realization compels us to remain vigilant and discerning, lest we fall prey to the illusion of progress while the same old dynamics play out behind the scenes.

My primary grievance with the current system, if I'm being honest, is the glaring absence of any personal gain from the widespread corruption that seems to permeate our political landscape.

It raises the question: why am I not benefiting from the very system that

GIOVANNI METRO STOP GALLERY - WWWG PRODUCTIONS LTD. SINGAPORE - 2025

A MIND TOTALLY FILLED WITH
MISGUIDED DECISIONS 4

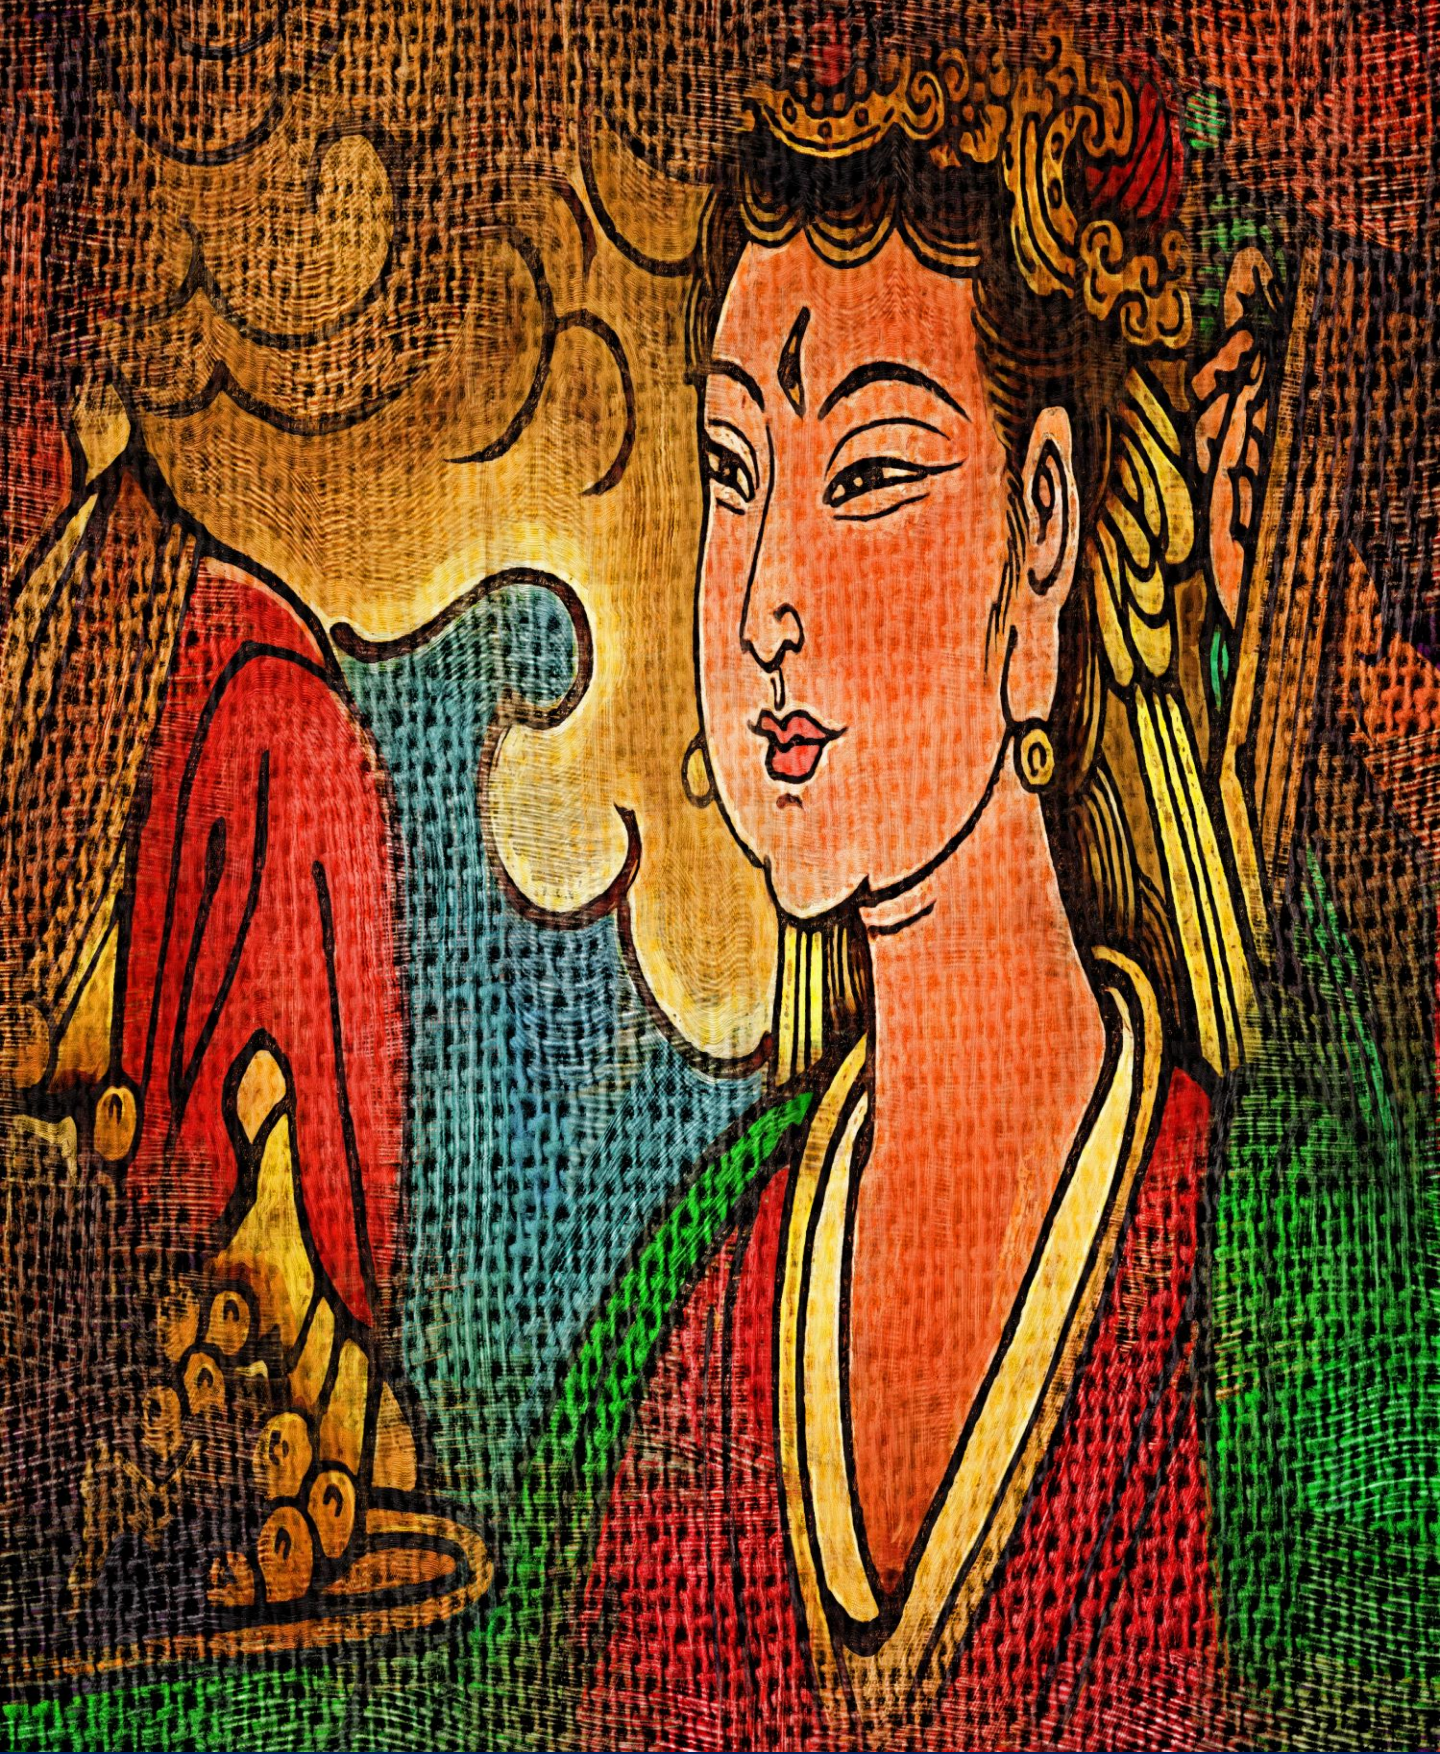

thrives on deceit and manipulation?
This situation feels ripe for a revolution,
and if I were in charge, my first act
would be to send 999 out of every 1,000
political party officials abroad, where
they could trade their underhanded
tactics for honest work as laborers in
construction.

It's time to shake up the status quo and
demand accountability, ensuring that
those who have exploited the system
are put to work in a way that reflects
the true value of their contributions—or
lack thereof.
